santeri.rantanen@bluefors.com

fi.linkedin.com/in/santerirantanen

Kirkkonummi, FI

IT SKILLS

AutoCAD | Inventor | SolidWorks | Catia | CREO
Siemens NX | Teamcenter | Windchill | SolidPDM
EPDM | Enovia | SAP | Arduino | Siemens Logo!
Tia Portal | Mathcad | LTSpice | Matlab | Aton
RobotStudio | Automation Studio | Unity | Cads
MSOffice | Rhino

HARD SKILLS

Finite element method (FEM) |
Computer-Aided Design (CAD) |
3D Printing and Additive Manufacturing |
Robotics and Mechatronics | Thermodynamics and
Heat Transfer | Pneumatics and Hydraulics |
Control Systems and Automation |
Technical Drawing and Drafting Standards |
Materials sciences |
Manufacturing Processes: Sheet metals, Rolling,
Die Casting, Laser cutting, Plastic injection
moulding, Bending, Welding, Machining, Turning

SOFT SKILLS

Attention to Detail | Emotional Intelligence |
Teamwork and Collaboration |
Communication and Interpersonal Skills |
Problem-Solving and Critical Thinking |
Creativity and Innovation | Time Management
and Organization | Leadership and Mentorship |
Continuous Learning and Professional
Development | Adaptability and Flexibility

LANGUAGES

Finnish	Native	English	Proficient
Swedish	Intermediate	German	Beginner
Spanish	Beginner	Turkish	Beginner

INTERESTS

Gym | Tennis | Photography | Cooking |
Miniatures | Combat/Self-defense | Games |
Robots | AI | VR/AR/IOT | 3D-Printing |
Psychology | Brains | History | Medical sciences
Leadership/Management

SUMMARY

I am a creative-minded engineer with a strong business orientation and a passion for teamwork. I thrive in diverse communities where I can be both collaborative and independent. My experience has taught me persistence and solution-oriented thinking, which I apply to every challenge.

I value a spontaneous and flexible yet systematic work culture, and I firmly believe that no problem is unsolvable. Innovation and creativity are at the core of my work, and I draw inspiration from my photography hobby to bring fresh perspectives into engineering and, in the future, into leadership.

With a leadership mindset, I aspire to become a respected leader whom my team can trust. I am dedicated to supporting others and fostering a culture of kindness, collaboration, and shared success.

EXPERIENCE

Mechanical Engineer, Bluefors Oy, Helsinki

Feb 2026 – Present

- Productisation and customisation for new High Density Amplifier Array product.

Design Engineer, Huld Oy, Espoo

Jan 2023 – Feb 2026

- **Projects at Metso:**
 - Designed Metso flotation tank assemblies and prepared comprehensive manufacturing drawings.
 - Streamlined product development by standardising components and refining design processes.
 - Improved assembly procedures to ensure ease of use and minimise manufacturing disruptions.
 - Optimised flotation tank master models for faster and more efficient utilisation.
- **Project for K. Hartwall:**
 - Productised parcel sorting shelves for Amazon sorting centers to reduce costs and improve overall manufacturability.
 - Redesigned the lifting and lowering mechanisms and moving shelf levels to optimise installability, packability, and maintainability.
- **Projects for Avant Tecno Oy:**
 - Data validation for the new PLM system. Cleaned data and corrected item revisions in Windchill.
 - Assisting with component organization in E3 and SolidWorks.
- **Project for Revenio/iCare:**
 - Mechanical design for a tonometer lab prototype. Designed the prototype base for equipment and 3D-printed the base. Planned the concept for air pressure piping.
- **Project for Oceanvolt Oy:**
 - Mechanical design of SP25 propulsion system. Redesigned the leg to be machined as a single piece, assisted in redesigning other parts, and created a new assembly.
- **Project for Kone Oyj:**
 - Developing parts and assemblies for elevator sling.

Design Engineer, Pemamek Oy, Tampere

Dec 2021 – Dec 2022

- Mechanical design of welding automation equipment.
- Creating 3D models and layouts, designing large steel structures, and performing a few FEM structural analysis.

Design Engineer, ABB Oy, Helsinki

June 2018 – Nov 2021

- Creating induction motor 2D layouts and manufacturing drawings using AutoCAD and Siemens NX, including customer-specific drawings.
- ECHA (European Chemicals Agency) project for existing products to classify all chemicals used in machines.

EDUCATION

M.S. student in Mechanical Engineering

Aug 2025 – Present

LUT University

- Major: Automation and Control, Welding Technology and Laser Processing
- Minor: Leadership

B.E. in Mechanical Engineering
Tampere University of Applied Sciences

Sept 2013 – May 2018

- Major: Machine Automation, credits 240
